

Full Stack Web Development Lab

Week 2 – Record

Aim

To design and develop a multi-page website for an "ANITS Campus Placement Portal" using HTML, consisting of a Home page, About page, Registration page (with an HTML form using various input types), Login page, Companies page, Contact page, and a Registration Success page, linked together using a common navigation menu.

Description

This lab extends basic HTML to build a complete multi-page website rather than a single page. All seven pages share a common header (logo, institute name, and navigation bar) and footer, linked using relative hyperlinks () so a user can move between pages. The site demonstrates semantic tags (<header>, <nav>, <section>, <main>, <footer>), media elements (<video>, , <iframe>), tables for tabular data, and an HTML <form> with almost every HTML5 input type for student registration. A shared external stylesheet (styles/style1.css) is used to style all pages consistently.

Details about the Program

Where Saved	All files are saved inside the project folder FL_LAB_ANITS/fs_week_2/ in the GitHub repository raviteja-codehub/FL_LAB_ANITS . It contains the 7 HTML pages (index.html, about.html, register.html, login.html, companies.html, contact.html, success.html), a shared stylesheet at styles/style1.css , and supporting media inside the images/ and videos/ folders.
Where Executed	Each page is executed inside a web browser (Google Chrome / Edge / Firefox). The project is also hosted live using GitHub Pages and can be accessed at: https://raviteja-codehub.github.io/FL_LAB_ANITS/fs_week_2/
How Executed	1. Locally: Open index.html by double-clicking it or via "Open with Browser"; the navigation menu is then used to move to the other pages, since all files sit in the same folder and link to each other by filename. 2. Online: The whole folder is pushed to GitHub, and GitHub Pages is enabled on the repository so the site is served live and each page can be opened directly through its own URL.

Program & Output (Page-wise)

1. Home Page (index.html)

The landing page of the Campus Placement Portal. It shows the institute logo and name inside a header, a navigation menu linking to all other pages, a hero section with a background video and welcome text, a scrolling marquee announcement, and a statistics section (Recruiters, Placement Rate, Highest Package, Offers) displayed as cards.

About the Training & Placement Department

Anil Neerukonda Institute of Technology & Sciences (ANITS) has a dedicated Training & Placement Department led by Prof. P. Padmaja and supported by 18 Faculty Coordinators. The department is committed to maximizing student placements in both software and core engineering sectors through continuous skill development and industry engagement. ANITS provides comprehensive Campus Recruitment Training (CRT) covering Quantitative Aptitude, Logical Reasoning, Verbal Reasoning, English Communication, Group Discussions, and Interview Skills. These programs are conducted by experienced in-house trainers to prepare students for campus recruitment. Recruiter feedback and alumni performance are regularly analyzed to improve training strategies and align them with industry requirements. The institute offers excellent placement infrastructure, including a 400-seat air-conditioned auditorium, computer laboratories, and examination halls accommodating over 500 students, and well-equipped interview rooms for smooth recruitment processes. Through dedicated efforts, continuous improvement, and strong collaboration with industry, ANITS has consistently achieved an excellent placement record. The institute is recognized as one of the Top Ten Most Preferred Private Engineering Colleges in Andhra Pradesh by APSCHE among more than 700 engineering institutions.

Our Department Focuses On

- Identifying employment opportunities for fresh engineering graduates
- Building strong industry-academia partnerships
- Providing comprehensive campus recruitment training programs
- Promoting innovation and Entrepreneurship development

2026 ANITS |Department of Training & Placement

3. Registration Page (register.html)

A student registration form built with an HTML `<form>` element. It is divided into four `<fieldset>` groups — Personal Information, Academic Information, Online Information, and Declaration — and demonstrates many HTML5 input types such as text, password, email, tel, number, date, time, datetime-local, select, radio, checkbox, url, search, file, color, range and textarea. On submission the form redirects to success.html.
