

Full Stack Web Development Lab

Week 5 – Record

Aim

To extend the "ANITS Central Placement Portal" login page (Week 4) by adding an auto-logout feature on the welcome page, which tracks user inactivity using JavaScript timers and automatically redirects the user back to the login page if no activity is detected for 10 seconds.

Description

This lab reuses the Week 4 login page (**index.html**) and enhances the welcome page (**sucess.html**) with an inactivity/auto-logout mechanism. A constant **INACTIVITY_LIMIT** (10000 ms) defines the allowed idle time. The **setTimer()** function clears any existing timers, starts a visible countdown using **setInterval()** (updating a status message every second), and schedules the logout using **setTimeout()**. The **resetTimer()** function is called on every user activity event — **mousemove**, **keydown**, **click**, **scroll**, and **touchstart** — clearing the status text and restarting the countdown, so the timer only fires if the user is truly idle. When the timer completes, **logoutUser()** shows an alert ("You were inactive for 10 seconds...") and redirects the browser back to **index.html** using **window.location.href**. This demonstrates practical use of JavaScript timer functions (**setTimeout**, **setInterval**, **clearTimeout**, **clearInterval**) and DOM event listeners.

Program

</html>

```

Details about the Program

Where Saved	Both files are saved inside the project folder FL_LAB_ANITS/fs_week_5/ in the GitHub repository raviteja-codehub/FL_LAB_ANITS — index.html is the login page (same as Week 4) and sucess.html is the welcome page, now updated with the inactivity-timer script. Both use internal (embedded) CSS and JavaScript.
Where Executed	The pages run inside a web browser (Google Chrome / Edge / Firefox). The project is also hosted live using GitHub Pages at: https://raviteja-codehub.github.io/FL_LAB_ANITS/fs_week_5/
How Executed	1. Locally: Open index.html and log in with admin / admin123; the browser redirects to sucess.html, which immediately starts the 10-second inactivity timer. Moving the mouse, typing, clicking, or scrolling resets the timer; staying idle lets the on-screen countdown reach zero, after which an alert appears and the page redirects back to index.html. 2. Online: The folder is pushed to GitHub with GitHub Pages enabled, so the same login and auto-logout flow works directly from the live URL in any browser.

Output

After logging in and remaining idle for 10 seconds, the countdown message appears on the welcome page and the browser then shows an alert before redirecting back to the login page, as shown below:

Anil Neerukonda Institute of Technology
Campus Placement Portal

[Home](#) [About](#) [Apply Job](#) [Results](#) [Upcoming Placements](#) [Contact](#)

raviteja-codehub.github.io says
You were inactive for 10 seconds. Redirecting to login page.

OK

Login Successful!

Welcome to ANITS Central Placement Portal

Login Time: 9/9/2026, 10:16:56 PM

Good Night

Inactive for 1s... redirecting soon.

Important Notice

- Please contact the Training & Placement Office regularly for updates.
- Stay informed about the latest MAANG Companies Recruitment Process.
- Check your registered Email ID and Placement Portal for announcements.
- Attend all Pre-Placement Talks (PPTs), Aptitude Training, Mock Interviews, and Company Drives.
- Keep your Resume, Academic Documents, and ID Card ready before every recruitment process.
